

Canine Learning Centers Presents

THE OPTIMUM NUTRITION & BEHAVIOR SEMINAR

Learn:

- **How to properly feed cooked, dry & canned food!**
- **How to properly feed raw fresh food**
- **How your dog's digestive system works!**
- **How stress & diet affect your dog!**
- **What your dog is trying to tell you when he eats grass or licks/chews/bites/scratches!**

Did you KNOW:

- **The most common causes of allergies are dietary deficiencies!**
- **Serious and life-threatening diseases can be the direct result of an incorrect diet!**
- **What you feed your dog can cause behavior problems, even aggression!**

After years of virtually being ignored, the connection between nutrition and behavior, longevity and overall good health is finally being recognized.

Improvements in all of these conditions can often be achieved through proper dietary management

Your options are many:

- From adding some supplements, some raw ingredients!
- To making your own!
- To changing dog food!
